

MACHINE VENDED BAR-CODE LABELS

Bar Code Postal Labels

From 1996, the Israel Postal Administration started a process of computerising its mail delivery services. Following an experimental period, a bar-code system was adopted. For this purpose various bar-code labels were put in use, easily identified by their background colour: 1. Registered: sky blue 2. Express: red 3. R-Express: orange 4. R-A.R. : green Use: upon mailing, the label is attached to the mail item. One bar-code strip is removed and attached to the client's receipt. other is attached to the recipient's form. Each label includes printing date (month and year only). bar-code labels are a **tracking device** and not a method of postal payment. Therefore they can not be regarded as "stamps" (unlike the vending machine labels).

Prices: unused on original paper adhesive. On cover commercial mail: -50%

Bar Code EXPERIMENTAL labels

Few experimental issues are known. These labels are seldom seen.

Ba#	Size mm	U S \$
BCRL-00a black/white. no pr. date	? 109x44	50.00
BCRL-00b carmine. no pr. date	109x44	50.00
BCRL-00c rose. Date: 08.98	100x40.5	50.00
BCEX-00 no pr. date	55x35	50.00
BCRX-00 no pr. date	55x35	50.00

There are two different sizes of R-labels. The date is printed red on the upper white box under the bar-code. The upper bar-code is non-removable while the lower three are removable.

From Istanbul R-letter and BCAR-03

R-cover from Switzerland with Swiss R-bar-code label and Israel BCIR-01 label.

Incoming R-mail labels

A late addition to the bar-code series is a label (April 2003) to trace incoming mail:
